To the department heads at the FCC,
There are a couple of issues on the hill that cause great concern! They are the NAB's petition's 04-160 and HR 4026. I'm sorry but I thought we were in the United States of America. This is a move to show American's that they will be told what they can and cannot listen to. XM is a paid service and I am glad to be an owner of several of the radios. They have decided to provide instant traffic and weather which I find very usefull especially where the price of gas is over \$2.00 per gallon. The price of gas is the issue that the hill should be spending more time on investigating instead of trying to strip us of our first ammendment rights. I respectfully request that the folks at the FCC throw out the petition to stifle XM from providing great variety and important traffic and weather. Thank you for your time and attention to this all important matter.
Thomas Kay,
Massachusetts
